CURRENT SURCHARGE STATUS

<p>CURRENT DIESEL PRICE</p> <p>\$1.96 / L</p> <p>NRCan — May 29, 2026</p>	<p>BASELINE PRICE</p> <p>\$1.90 / L</p> <p>Rates built around this price</p>	<p>ACTIVE TIER</p> <p>Tier 1</p> <p>5% surcharge active</p>
<p>Tier 1 is currently active. Diesel sits \$0.06 above our \$1.90/L baseline. A 5% surcharge applies — \$136.50/hr brokered and \$162.75/hr retail. Itemized separately on every invoice.</p>		

HOW IT WORKS

- 1 We set a baseline diesel price**

Our hourly rates are built around diesel at \$1.90/litre. When diesel is at or below that price, your rate stays as quoted — no surcharge applied.
- 2 Diesel prices are monitored monthly**

We reference the Natural Resources Canada weekly average for Toronto — a publicly available, government-published benchmark anyone can verify.
- 3 A tiered surcharge applies when prices rise**

For every \$0.10/L above \$1.90, a 5% surcharge is added to your hourly rate — always as a separate line item on your invoice.
- 4 When fuel drops, so does the surcharge**

If diesel returns to \$1.90/L or below, the surcharge is removed entirely. You will always be notified in writing before any tier change takes effect.

"Transparent pricing — when fuel costs change, we show you exactly what changed, why, and by how much."

— Chaise Ireland, CCG
